Research Interests

I lead programs to measure the spins of compact objects across regimes, from infant millisecond magnetars in superluminous supernovae (SNe) to supermassive black holes resolved at the horizon scale. These measurements probe strong-field physics where no laboratory can reach and expose the engines driving the most energetic phenomena in the Universe.

Tags:

Astrophysical Phenomena: core-collapse SNe, superluminous SNe, black hole spacetimes, chirping SNe, photon rings
Observational Techniques: very-long-baseline interferometry (VLBI), radio astronomy, optical photometry, optical spectroscopy
Computational & Theoretical Methods: general relativity, Bayesian modeling, machine/deep learning, geometric modeling, interferometric imaging, shock-cooling models, light curve modeling

Education

University of California Santa Barbara, Santa Barbara, CA, USA 2021–2026
Ph.D. in Physics (completed) 2026
M.A. in Physics (completed) 2023

University of Massachusetts Boston, Boston, MA, USA 2017–2021
B.S. in Physics, summa cum laude, with distinction

Publication Summary

10	159	28,000+	45	105
First-author	*Total*	*Citations*	*h-index*	*i10-index*

Selected Publications

J. R. Farah, Prust, L. J., Howell, D. A., *et al.*. 2026. *Lense-Thirring precessing magnetar engine drives a superluminous supernova.* Nature, 651, 321-325.
Reported the discovery of the first "chirping" supernova and its implications for the central engine hypothesis. Selected for the cover of the March 12, 2026 issue of *Nature*.

J. R. Farah, Galison, P., Akiyama, K., *et al.*. 2022. *Selective Dynamical Imaging of Interferometric Data.* ApJL, 930, L18.
Seventh paper of the EHT's first Sagittarius A* results series, with full Collaboration co-authorship. Method recognized by the LeRoy Apker Award, EHT Early Career Award.

Selected Work and Research Experience

Miller Institute for Basic Research in Science
Miller Research Fellow, UC Berkeley — Berkeley, CA 2026–Present
Hosts: Prof. Daniel Kasen, Prof. Raffaella Margutti

Black Hole Initiative
Black Hole Explorer Fellow, Harvard University — Cambridge, MA 2026
Supervisor: Dr. Michael Johnson

Las Cumbres Observatory 2021–2026
NSF Graduate Research Fellowship — Goleta, CA
Supervisor: Prof. Andy Howell

Harvard-Smithsonian Center for Astrophysics 2018–2021
Smithsonian Fellowship with the Event Horizon Telescope — Cambridge, MA
Supervisor: Dr. Michael Johnson

Undergraduate Research, UMass Boston and Harvard University 2017–2021
Quantum computing with Dr. Alioscia Hamma (2019–2021); QBism as an Oracle Fellow with Dr. Christopher Fuchs (2017–2019); ATLAS Micromegas detector instrumentation with Dr. Melissa Franklin, Harvard Laboratory for Particle Physics and Cosmology (2017–2018)

Leadership and Collaboration Roles

Black Hole Explorer (BHEX)
Deputy Science Lead, Goal I (Photon Rings) 2026–Present
Core Member 2020–Present
Contributing to the science case of the proposed NASA space-VLBI mission since 2020. Lead development of its black hole spin-inference capabilities (i.e., photon ring analyses, cross-validation, and simulated data challenges) with extended line of first-author BHEX papers. Advise the PI on development of the BHEX Student Collaboration program.

CHIRPS Collaboration 2026–Present
Founder and Coordinator
CHaracterization and Inference of Rotating, magnetar-Powered SLSNe. Multi-institution collaboration (17 members across 9 institutions) for the discovery and modeling of chirping superluminous supernovae. Operates a public real-time chirp-detection filter on the ANTARES broker for Rubin/LSST alerts and leads the development of theoretical interpretations. Website.

Research Group, UC Berkeley 2026–Present
Group Lead
Supervise 5 student researchers at UC Berkeley, UC Santa Barbara, and Northwestern/CIERA on BHEX spin inference and the CHIRPS program.

UltraViolet EXplorer (UVEX) 2026–Present
Collaboration Member, Supernova Science
Assisting with development of the supernova observing strategy, including the cadence required to constrain early temperature evolution.

Global Supernova Project 2021–Present
Builder
Contributed to core collaboration infrastructure (including the Supernova Exchange) and performed data reduction for collaboration papers: 1000+ optical spectra and dozens of multi-band light curves. Can trigger Las Cumbres 1-m and 2-m photometric and spectroscopic follow-up.

Event Horizon Telescope Collaboration 2018–Present
Collaboration Member
Joined as the collaboration's first undergraduate member. Contributed to imaging, modeling, and theory for the first images of M87* (2019) and Sgr A* (2022). Led the selective dynamical imaging paper in the 2022 Sgr A* results (ApJL, 930, L18), recognized with the EHT Early Career Award.

Selected Honors and Awards

Miller Fellowship, Miller Institute for Basic Research in Science, Berkeley — 2026–2029
Award amount: $354,000

Bhaumik Prize Postdoctoral Fellowship, UCLA (declined) — 2026
Award amount: $276,000

UC Santa Barbara Mananya Tantiwiwat Award — 2025

Broida-Hirschfelder Fellowship — 2025
citation: *In recognition of his project uncovering the secrets of the strangest object in the universe, the black hole photon ring.*

1st Place Award, UC Santa Barbara Grad Slam — 2025
Round 1 (Physics and Chemistry)

UC Santa Barbara GSA Excellence in Teaching Award (nominated) — 2025

UC Santa Barbara Academic Senate Outstanding Teaching Assistant Award (nominated) — 2024

Event Horizon Telescope Early Career Award — 2022
citation: *For his leadership and contribution to the dynamic imaging of the interferometric data used to image Sgr A*.*

LeRoy Apker Award — 2021
citation: *For the invention of the selective dynamical imaging method, with applications for studying rapidly-varying black holes.*

UC Santa Barbara James and Mary Jo Hartle Graduate Fellowship — 2021

National Science Foundation Graduate Research Fellowship — 2021–2026
Award amount: $138,000

Breakthrough Prize in Fundamental Physics (co-recipient) — 2020

Barry M. Goldwater Scholarship — 2019

National Science Foundation Diamond Achievement Award‡ — 2019

Smithsonian Fellowship — 2018, 2019

Oracle Fellowship — 2018, 2019

AJAS/AAAS Lifetime Fellowship — 2018

Selected undergraduate scholarships: Chancellor's Scholarship (2017–2021), Alton J. Brann Endowed Scholarship (2019), Northrop Grumman Scholarship (2020), Arthur W. Martin III Scholarship (2021) — 2017–2021

Invited Talks and Colloquia

A new theoretical framework for chirping supernovae. Montana State University, Bozeman, MT. October 2026.

Precessing magnetar central engine drives a superluminous supernova. Galactic Center Group, UC Los Angeles, Los Angeles, CA. April 2026.

The first 4 years of SN 1993J revisited. UC Berkeley, Berkeley, CA. September 2025.

Lense-Thirring precessing magnetar engine drives a superluminous supernova. Multi-RAPTOR colloquium, UC Berkeley, Berkeley, CA. September 2025.

Inferring black hole spin from images of the photon ring. VandyGRAF Initiative, Vanderbilt Uni-

versity, Nashville, TN. September 2024.

What Lies Within: Imaging the Galactic Center. April APS Meeting, New York, NY. Invited session speaker. April 2022.

The First Image of a Black Hole. Skyscrapers, Inc., Seagrave Memorial Observatory, North Scituate, RI. 2021.

Seminars and Contributed Talks

A new theoretical framework for chirping supernovae. Multi-RAPTOR seminar, UC Berkeley, Berkeley, CA. October 2026.

Spin inference of compact objects across regimes. Black Hole Initiative, Cambridge, MA. August 2026.

Precessing magnetar central engine drives a superluminous supernova. METAL group, University of Virginia, Charlottesville, VA. August 2026.

Spin inference of compact objects across regimes. Greene research group, Princeton University, Princeton, NJ. July 2026.

Precessing magnetar central engine drives a superluminous supernova. Narayan group, Center for Astrophysics | Harvard & Smithsonian, Cambridge, MA. July 2026.

General relativity meets a supernova for the first time. Las Cumbres Observatory colloquium, Goleta, CA. January 2026. Event URL.

Lense-Thirring precessing magnetar engine drives a superluminous supernova. KIPAC, Stanford University, Stanford, CA. November 2025.

Machine- and deep-learning-driven angular momentum inference from Black Hole Explorer observations of the $n = 1$ photon subring. *Topics in Gravitational Physics*, APS Global Physics Summit. March 2025. Event URL.

Current and future impacts of survey capabilities on the stripped-envelope problem. Kavli Institute for Theoretical Physics, Santa Barbara, CA. February 2025.

Shock-cooling constraints via early-time observations of the Type IIb SN 2022hnt. Kavli Institute for Theoretical Physics, Santa Barbara, CA. February 2025.

Selective dynamical imaging of interferometric data and the second image of a black hole. *Astro Tea*, University of California, Santa Barbara, CA. June 2022.

Seeing the unseeable: the first image of a black hole. University of Massachusetts Boston, Boston, MA. May 2019.

Imaging a black hole with the Event Horizon Telescope. Harvard University, Cambridge, MA. April 2019.

Teaching and Mentoring

Invited workshop creator and lecturer, *Presentation presentation: a seminar on seminars*, Las Cumbres Observatory, Goleta, CA. January 2026.

Death Star Seminar, founder and lecturer. Informal graduate seminar series on supernova theory, Las Cumbres Observatory, Goleta, CA. Designed curriculum and delivered lectures. 2026.

Creator and lecturer, online derivation series, *Astraveo*. Blackboard lectures working through core astrophysics and general science results from first principles. 2025–Present.

Teaching Assistant, PHYS 23 (Electrostatics and waves), UC Santa Barbara. Fall 2024.
UC Santa Barbara GSA Excellence in Teaching Award (nominated)

UC Santa Barbara Academic Senate Outstanding Teaching Assistant Award (nominated)

Guest Lecturer. Astronomy 121, University of Massachusetts Boston, Boston, MA. 2019 (x2), 2020 (x2).

Graduate research mentoring

Nicole Flors (CIERA/Northwestern) 2026–Present
Project: Simulation of magnetar+disk system with HAM-R

Undergraduate research mentoring

Eyouel Abate (UC Berkeley) 2026–Present
Project: Development of automated CHIRPS filter on Rubin infrastructure

Austin Mei (UC Berkeley) 2026–Present
Project: Frequency-domain methods for identification of periodicity in supernova light curves

Mai Haller (UC Berkeley) 2026–Present
Project: Investigation of contrast ratios of SLSNe to surface brightness of hosts

Courtney Duong (UC Santa Barbara) 2024–Present
Project: Convolutional neural network for extraction of the $n = 1$ black hole photon ring (Published in *ApJ*)
Award: *Gene and Susan Lucas Undergraduate Research Scholarship*
Award: *Edison STEM Research Scholarship*

Franklin Myhre (UC Santa Barbara) 2024–Present
Project: Development of a `python` library for automated image-domain subring extraction

Sanjit Masanam (UC Santa Barbara) 2024–2026
Award: *2025 Goldwater Scholarship (nominated)*
Award: *2025 Ernest F. Hollings Scholarship*

Songgun Lee (UC Santa Barbara) 2024–2026
Co-founder at Masterminding

Tazzy Imbabi (UC Santa Barbara) 2024
Project: Exploration of selective dynamical imaging applications to BHEX

Service

Referee:
The Astrophysical Journal
Astronomy & Astrophysics

Internal referee, Event Horizon Telescope Collaboration.

Invited presenter, Las Cumbres Observatory Science Advisory Committee, Goleta, CA. Invited to present on the observatory's high-energy astrophysics science program. August 2025.

Local Organizing Committee, EHT Collaboration Meeting. 2020.

Local Organizing Committee, 2nd EHT Imaging Workshop, Black Hole Initiative, Harvard University, Cambridge, MA. July 2018.

Founder and organizer, *Research@UMB*, University of Massachusetts Boston. Connected undergraduates seeking research experience with faculty through faculty lightning-talk sessions and direct student–faculty matching. 2019.

Outreach and Public Engagement

Co-founder and host, *Astraveo*, science-communication YouTube channel (with D. James). 2023–Present. Channel URL.

14,000+ subscribers; most recent video (including an on-camera blackboard lecture) 150,000+ views; 4+ videos with 25,000+ views each, 100+ videos total; research vlog, documentaries.

General relativity beats the heart of a dying star. Public lecture, Santa Barbara Museum of Natural History. March 2026. Event URL.

Extragalactic science with the Vera C. Rubin Observatory. Public lecture, Santa Barbara Museum of Natural History. August 2025. Event URL.

The Black Hole Explorer and the edge of the universe. Public lecture, Santa Barbara Museum of Natural History. April 2025. Event URL.

The Black Hole Explorer. *Astronomy on Tap*, Santa Barbara, CA. December 2024. Event URL.

What does an astronomer do? Canalino Elementary School, Carpinteria, CA. October 2024.

The biggest telescopes! Aliso Elementary School, Carpinteria, CA. October 2023.

Imaging the black hole at our galaxy's center. Public lecture, Santa Barbara Museum of Natural History. May 2023. Event URL.

LCO's top 9 tips for taking your best black hole photo. *Astronomy on Tap*, Santa Barbara, CA. November 2022. Event URL.

AskScience AMA Series: Event Horizon Telescope results on the Galactic Center. *Reddit*. May 2022. Article URL.

LCO's top 9 tips for taking your best black hole photo. Honors and AP physics classes, Medford High School, Medford, MA. 2022.

Selected Media and Press

Appearances

Guest, *Nature Podcast*, on the chirping supernova SN 2024afav. March 2026. Listen.
Participant, Event Horizon Telescope press conference unveiling the first image of Sgr A*, Washington, D.C. May 2022.
Galison, P. L. (Director). 2021. *Black Holes: The Edge of All We Know.* Sandbox Films. View on Netflix.
Galison, P. L. (Director). 2019. *Portrait of a Shadow.* Sandbox Films.

Coverage

SN 2024afav (Nature, 2026): Reuters, *The Times*, *The Independent*, *Science*, *Scientific American*, *Nature* News & Views, *Nature* Video, *Science News*, *Ars Technica*, *Smithsonian*, *Popular Science*, *Sky & Telescope*, *BBC Sky at Night*, *Space.com*, *Live Science*, *ScienceAlert*, *IFLScience*; international coverage including a print feature in *Tähdet ja avaruus* (Finland), *Spektrum der Wissenschaft* (Germany), Agencia SINC (Spain), *Media INAF* (Italy), *Der Standard* (Austria), and *La Nación* (Argentina); YouTube features by Astrum and Anton Petrov. Press releases by UC Berkeley, UC Santa Barbara, and Las Cumbres Observatory.

Selective dynamical imaging of Sgr A (2022):* profiles in the *Santa Barbara Independent* and on KCLU radio; UC Santa Barbara/LCO press release.

Event Horizon Telescope, undergraduate work (2019–2021): profile in *Symmetry* magazine (2020); Center for Astrophysics | Harvard & Smithsonian and UMass Boston coverage of the Apker Award (2021).
